# COVID-19 Content Pack for Dragon Medical

To assist customers addressing the COVID-19 pandemic, Nuance has built a **content pack** specific to COVID-19 to improve provider efficiency when using Dragon Medical to capture crucial data points for COVID-19 patients. This content pack can be distributed to Dragon Medical One and Dragon Medical Network Edition users through the Nuance Management Center (NMC).

Deployment instructions

1. Download the Nuance COVID-19 Content Pack XML file.
2. Choose a deployment strategy. Nuance recommends deployment across sites for broad sharing. Customers can choose to deploy by site, group, or user.
3. Import the Nuance COVID-19 Content Pack XML file, as shown below.
4. Select the **Speech Recognition** tab.
5. Select the **Manage** icon.
6. Ensure **Auto-texts** is selected.
7. Click the **Import** button.
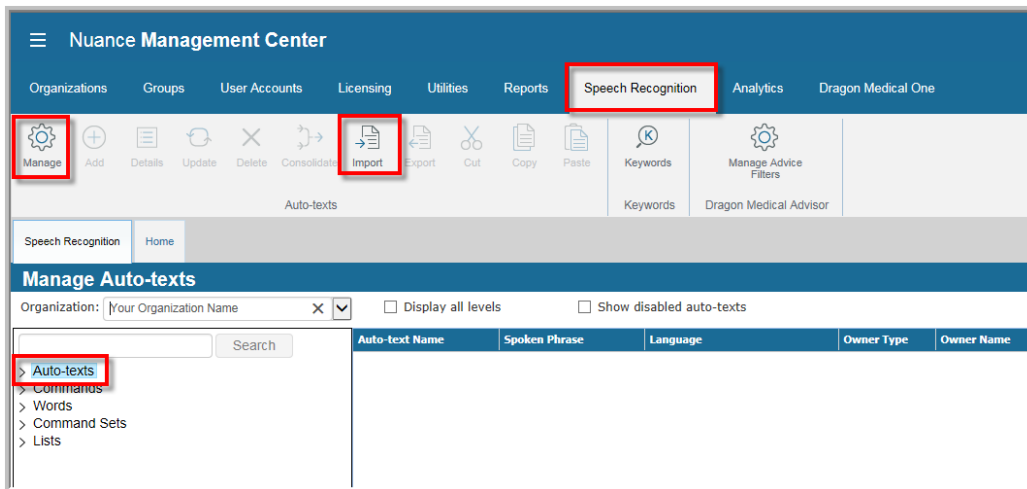

8. Select **Nuance Management Server format (XML)**, browse to the XML file location and click **Next**.

9. Click **Select All** to import all Auto-texts and click **Next**.

10. If prompted (not all customers will see this), select your organization.
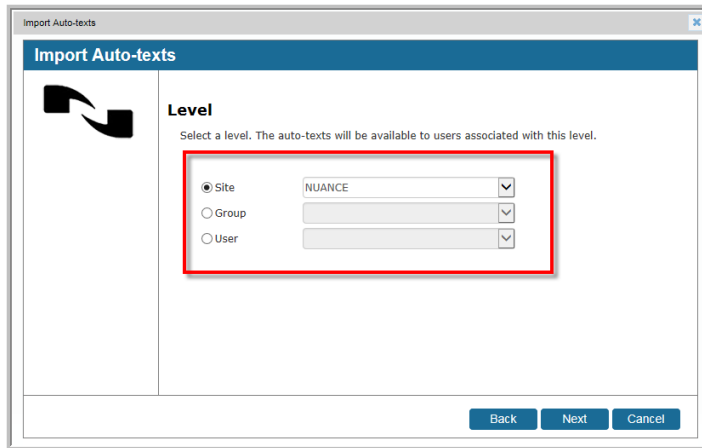

11. Select your chosen **deployment level**.

12. Click **Next** to import the Auto-texts.
13. Once the import is complete, click **Next** to verify no errors occurred during import.
14. Click **Finish**.

Once imported, the COVID-19 Auto-texts are available for use. In addition to deploying the COVID-19 Content Pack, we recommend customers add "COVID-19" to the Dragon Medical vocabulary using the appropriate instructions below.

- Instructions for adding COVID-19 to the Dragon Medical vocabulary through Nuance Management Center
- Instructions for adding COVID-19 to an individual profile vocabulary in Dragon Medical One
- Instructions for adding COVID-19 to an individual profile vocabulary in Dragon Medical Network Edition

How to use the Content Pack:
- How to use Auto-texts instructional video
- Nuance COVID-19 Content Pack for Dragon Medical instructional video provides an overview of content and instructions for use.
